

Melon Playlist Data
Example

Web Scraping

```
'id': 49718
'artist_name': Taylor Swift
'song_name': Shake It Off
'length': 3:39
'issue_date': 20141027
'song_gn_dtl_gnr_basket': All detailed genres
'song_gn_gnr_basket': POP
```

BeautifulSoup

Query

```
f"https://www.last.fm/music/{artist_name}/_{song_name}"
```

Result

```
'tags': ['pop, 2014, haters gonna hate, taylor swift, love at first listen, pop, country, singer-songwriter']
```

BeautifulSoup

Query

```
f"https://www.melon.com/artist/timeline.htm?artistId={artist_id}"
```

Result

```
'birthday': 1989.12.13 -> Calculate age based on 'issue_data'
'activity_type' solo
```

Query

```
f"{song_name} {artist_name} official audio"
```

Result

Taylor Swift - Shake It Off (Audio)

Get URL
&
Wav file

Filtering process

- Is the singer born before 1970?
- Is there an absence of 'last.fm' tags?
- Is the duration of the downloaded wav file different from the 'length' info in the melon playlist dataset?
